2/1/18

Dear Valued Supplier,

We are pleased to announce the acquisition of the Kruman Equipment Co. by Dearing Compressor & Pump. A private family owned business located in Youngstown, OH.

As a valued supplier of Kruman, we want to keep you informed on the facts pertaining to the sale of the business. Accordingly, please see the attached copy of the press release from Dearing Compressor detailing the transaction. We will continue to promptly inform you of any events or changes that may occur as Kruman transitions over to Dearing.

Kruman will continue to operate as an integral business unit to Dearing's Industrial Products Division. Kruman will remain at its location at 3000 Penn Ave in Pittsburgh, PA and continue to provide high quality sales and service for compressed air systems. The new business combination will provide opportunity to our suppliers, customers, and employees for the expansion of our industrial products in Ohio, Western Pennsylvania, West Virginia, and Maryland.

We look forward to continuing the long-term relationships that Kruman has developed with their suppliers.

If you have any questions or concerns, please feel free to reach out to your Kruman contacts. Thank you for your continued support as a valued supplier.

Sincerely,

Albin Dearing
Chief Operating Officer

TWO INDUSTRIAL AIR COMPRESSOR LEGACIES MERGE: DEARING COMPRESSOR & PUMP CO. ANNOUNCES ACQUISITION OF PITTSBURGH- BASED KRUMAN EQUIPMENT

February 13th, 2018 (YOUNGSTOWN, Ohio) --- Dearing Compressor & Pump Co., the second oldest Gardner Denver industrial air compressor distributor, recently completed its first ever acquisition, merging with the oldest Gardner Denver distributor, Pittsburgh-based Kruman Equipment. The acquisition allows Dearing to effectively double their industrial air compressor business while providing counterbalance to the dynamic energy market.

CEO and President, Rick Dearing, announced that the newly merged operations will retain the Kruman name, and Kruman employees will continue in their same roles and operate as a division of Dearing, with shared services and resources that maximize efficiency and productivity. In addition to ensuring a smooth transition for employees, vendors and customers, Dearing will invest resources in developing Kruman as a division of their existing operations. The acquisition creates a concentration of resources to increase profitability, and the potential for additional job opportunities at all levels of the organization.

As VP Becky Wall explains, “The cultures of both Dearing and Kruman reflect common values of family owned and operated, multigenerational businesses --- making the blending of the two a natural fit and bringing together the best assets of both companies. With over 150 combined years of industry experience, both Dearing and Kruman have spent decades delivering a deep working knowledge of the products, parts and processes that ultimately have allowed them to offer their customers the most precise and effective application of systems and components.”

The acquisition positions Dearing for growth through territory expansion in a demanding marketplace by extending their overall footprint. The value of the Kruman brand will be a complement to Dearing’s industry-leading strengths in service, technology and packaging operations, and the combined resources will allow them to better serve new and existing customers across a seamless map of territories from northern Ohio down through southern Pennsylvania and into West Virginia and Maryland.

COO, Albin Dearing, describes Dearing's investment in Kruman as "a bold next step, and part of a comprehensive vision plan that includes continued expansion, increased revenue, ongoing implementation of technology, a balance between our industrial and energy operations, consistency of standardized processes, and contributions to community --- all while maintaining the integrity of our family values and a responsibility to create continued opportunities for our employees."

ABOUT GARDNER DENVER

Gardner Denver is a global manufacturer of compressors, pumps, blowers and other engineered solutions for various industrial applications. They specialize in highly engineered compressed air and vacuum solutions used across a range of industries, including pumps and consumable products used in oil and gas production, as well as air treatment systems, genuine replacement parts, and fluid transfer equipment for the chemicals, green technology and food and beverage industries.

ABOUT DEARING COMPRESSOR & PUMP CO.

Dearing is a family business operating in Youngstown, OH as the industry leader in industrial compressor distribution and packaging. For over 70 years, Dearing has based their reputation on service, reliability, integrity and innovation, and responsibly serves industrial and energy customers with dependable equipment and systems for compressed air, gas, process gas and hydraulic applications. The manufacturers they represent provide the absolute best equipment and support available in the marketplace today. Dearing continually matches these quality products with engineering, design expertise, installation experience and quality service to keep customers' equipment running properly for years.

Albin P. Dearing III, who sold and serviced Gardner Denver industrial air compressors, formed Dearing and Co. in 1945. It is the second oldest remaining distributor for Gardner Denver in the U.S.A. The company's introduction to the oil and gas business came in 1960 by working on Gardner Denver oil rig compressors. This later led to an expansion into the natural gas compressor market within Ohio. Today, Dearing's air and gas compressors serve automotive, aluminum, plastic, chemical, food, high-tech, lumber, rubber, steel and mining, as well as oil and gas industries. <http://www.dearingcomp.com/>
